PINK LADY APPLES

Background

Pink Lady apples were created in the 1970s in Australia, by breeding the Golden Delicious apple with an Australian apple called Lady Williams.

Fun Fact

The Pink Lady apple has the longest growing season of any apple: 200 days.

Growing and Harvest

- These apples often grow in warmer climates.
- Pink Lady apples grow on trees, and spend more time on the tree before harvesting than any other variety of apple!
- Harvesting typically begins in October or November, and continues through early-to-mid summer.

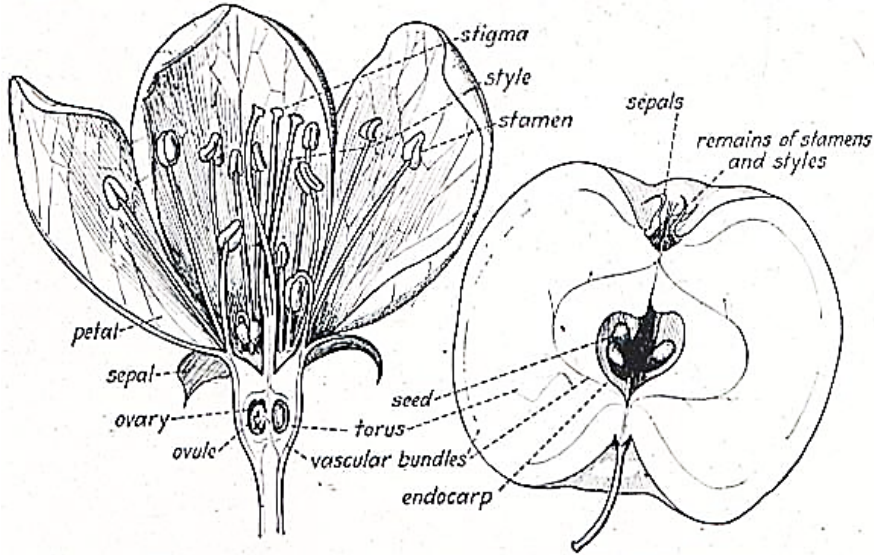

Your Pink Lady Apples today were grown by:

**Fifer Orchards
in Wyoming, DE**

Activities!

Color in the flower parts on the apple blossom below.

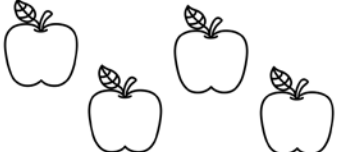

Name: _____

How Many Apples?

Count the apples. Color or dab with marker the correct number of apples.
