

# Woodburn School

## For the Fine & Communicative Arts

This is what we are working on:

**Math:** Students will be learning to identify numbers to 30, count a set of objects to 30, write numbers to 30 and notice patterns in numbers.

**Language Arts:** Students will be learning the routines for reading and writing workshops, exploring a variety of texts, genres, and authors to determine types of books they love. Students will also talk about their ideas with other writers to develop their ideas and make decisions about what to write.

**Social Studies:** Students will be sharing hopes and dreams, digital citizenship and learning about what it means to be a good citizen.
